

Dear Dolphin Families,

Summer has finally arrived in full swing! It was hot & humid outside, cicadas were chirping, and we were all excited for a well-deserved Summer vacation. Our monthly theme was "Under the Sea". There are so many amazing sea creatures. A dolphin is a mammal, just like you. They are also very intelligent, just like you! What is your favorite sea creature? Mr. Tom's is the seahorse. They are very tiny and cute, they cannot run and gallop like horses, but did you know that a male seahorse carries the eggs for 9 to 45 days and then gives birth? Just like if your daddy carried you in his tummy, crazy! Our field trip to the Tokyo Sea Life Park was a perfect opportunity to observe many sea creatures and we had a truly magnificent time there. We strongly recommend visiting the penguin section, where you can observe penguin chicks playing in their tiny village. It was so adorable!

We also had our Tanabata event. We learned all about the Japanese star festival and hung our wishes on the Tanabata tree. We were all so excited that our families could join us for this wonderful time and we cannot already wait for our future events held in the school!

Let us enjoy our return back to school and our next adventures together.

Happy birthday to Ayaansh, Makoto, Abir, Mia, Tanisha, Anay, Jayasha, and Ms. Yuko!

Kind Regards,  
Dolphins
