

Dear Cub Parents,

It was great to see all our friends and teachers back in school after the summer holiday. Our imaginations were stirred and inspired by September's theme "Under the Sea". We enjoyed learning about the different sea animals and their special characteristics. Playing the "What Am I" game was so fun. Can you guess what sea animal has a flat body and flaps its fins like wings? It's a manta ray! Manta rays can grow very big and they could jump out of the water too like dolphins. Wow! We enjoyed imitating the movements of the sea animals and we even had a race! We also did an under the sea yoga and mermaid ballet in our PE class. In addition, we read a story about the most beautiful fish in the ocean that had no friends because he did not want to share his shimmering scales with his friends. Therefore, he became so lonely. When Rainbow Fish learned to share his beautiful scales with other fishes he became happy and he had many friends. From this story, we learned that SHARING MAKES US HAPPY. We made rainbow fish and other sea animals in arts and crafts. We continued exploring life under the sea by reading books and watching some videos. We were amazed to see the colorful corals and fishes in the ocean. We would like to dive into the deep blue sea to see these beautiful creatures for real! Moreover, we learned that it is very important to keep our beaches clean. If we litter on beaches this trash can travel to the ocean and will harm the sea animals and can cause their death. In literacy, we focused on the letters s,a,t,p,i,n. We learned the things that begin with these letters. We also started learning how to write lowercase letters. We learned how to spell out and write our names too! In numeracy, we continued on learning how to write numbers 1-10 alongside counting the corresponding objects. We did backward counting as well. Moreover, we learned to compare the number of objects using the words "More, Less or Same. In celebration of the Mid-Autumn Festival, we made a moon-viewing "Tsukimi" craft and we also made dumplings in our Japanese class. We made dragonflies and mushroom crafts as well. The highlight of this month was Science Week. We created our own "Ocean in a Bottle". In this experiment, we learned that oil doesn't mix with water even if you shake it. The oil will always stay on top of the water. And when we rock the bottle, we see the waves moving. Fascinating! We also did the amazing "Volcano Experiment", inspired by "The Floor is Lava", one of our favourite games. We enjoyed the chemical reaction of baking soda and vinegar, erupting from our little volcanoes. We are very grateful for your presence dear parents! We are looking forward to having you again at our upcoming events. On the last day of September, we had our most awaited theme party. We all looked adorable in our costumes. In our cooking class, we crushed the blue ice popsicles on the plate and added some sea animal gummy. We also made an "oyster" snack. What a yummy treat! During the school break in August, our friend celebrated her birthday. Happy birthday Vismayi! Indeed, we had lots of fun in the sea of learning. Stick around for our next adventure!

Kind regards,
The Cub Team
