

Dear Cub Parents,

What an amazing month October was! Thank you for being a part of our exciting events. The Disaster Prevention Program in Kiyosumi Park on 26th was a meaningful learning program for both cubs and families. We experienced an earthquake and learned how to use a fire extinguisher. We also observed how parents and teachers could save people with AED. Having a picnic with our parents was a great way to end the day! Since then, cubs often demonstrate their knowledge from the program through drama play.

Another wonderful event in October was the Autumn Fair! Everyone was wearing fabulous costumes and the school looked creepier than usual. But, wasn't it fun to explore different parts of the school? Also, thank you for contributing to the donation!

Our October theme was "Shapes and Patterns". It was amazing to know that shapes are all around us. They're everywhere! We identified and talked about different shapes we saw inside and outside our classroom. As we walked to the park, we spotted different shapes and patterns along the way. We also enjoyed the shape hunting game as well as creating shapes with natural materials. Furthermore, using different shapes we created Halloween inspired figures such as shape monsters, clowns and witches. In addition, we learned what patterns were. It was challenging at the beginning. However, we found out that saying a pattern loud in rhythm made it easier to recognise.

In literacy, we focused on letters, MDGOCK. We can teach you how to write these letters verbally now! I spy worksheets is one of our favourite activities. You can challenge us as we are good at identifying beginning sounds of words! Most of us became confident with writing as our fine motor skills have been improved. In numeracy, learning numbers has always been fun! Most of us can now recognize numbers 1-17 and we can write those numbers as well. In Japanese class, we learned names of animals and made goldfish along a story. Just like the story, our goldfish also escaped from a fish tank and we went around the classroom to put them back in the tank. We also tried "Janken - Rock paper scissors"! In PE, we did a lot of Halloween inspired activities. Not only did we extend our gross motor skills, but we also learned to work in a team and enjoyed each other's company by cheering and working together!

Halloween Party was another highlight of the month! On 28th, everyone arrived in their fancy costumes. Trick-or-Treating walking was so much fun! We said "trick or treat" as we found pumpkins and teachers in unique costumes while walking around the school and along the river. We were so happy to get some treats in our Halloween bag. At school, we also made slime and wrapped Ms. Sheree and Ms. Eri to make mummies! At the end of the day, we had a cooking class with monster donuts. It was so delicious!

And last but not the least, we had a new friend joining our school! Welcome Yuvaan to the Bear Cubs!! We also celebrated special days of our friend and a teacher. Happy birthday, Sofia and Ms. Poovi!!

Kind regards,

Cubs Team
