

Dear Cub Parents,

First of all, thank you so much for your presence during the Term 2 PTM. It was a great pleasure discussing with you your child's academic progress and social behavior. We look forward to your continued support and partnership for the well-being of your child. November was a very busy month with lots of exciting activities. Our theme was "Money, Shops, and Jobs". We kicked off with a field trip to Shinagawa Aqua Park. How happy we were when we finally saw the sea animals we talked about in September during our "Under the Sea" theme. Many of us would like to be scuba divers, oceanographers, or even dolphin trainers when we grow up!

What an interesting profession! Learning about different jobs made us bewildered by what we really want to be in the future. A doctor, pilot, police officer, firefighter, teacher, chef, engineer, actor, or a princess? It's hard to choose! Well, for now, we just want to enjoy being a kid. Hence, we had so much fun during our dramatic play activities. We pretended to be doctors, patients, nurses, shoppers, sales assistants, and a firefighter that rescued Teddy from a burning building. Our visits to the police and fire station were unforgettable too! The police officers and firefighters were very nice to let us experience riding on a police car, fire truck, and motorbike. The firefighter even allowed us to try his gear. Surprisingly, it was so heavy! Furthermore, we learned about money from different countries. It has various sizes and colors. We also learned the value and importance of money in our daily lives. In addition, we made our own piggy bank so we can have our own savings. How we wished that the money tree craft we made would become real money! Ha!ha!ha! In literacy, we focused on the letters EURHB and numbers 18-20 in numeracy. We can recognize letters and beginning sounds well and we keep thriving with our writing skills. In Japanese class, we loved the owl craft we made using the autumn leaves we gathered at the park. Aside from our academic activities, we were practicing so hard for our Winter Concert performances. We were tired but happy at the end of the day. On the 25th of November, we were so proud of ourselves with our inspiring costumes. Look how awesome we were - the little professionals! We became chefs on this day as well. First, we made a cupcake craft. It looked so yummy and just looked so real but we couldn't eat it. Therefore, in our cooking class, we baked real cupcakes. It smelled so good when we took it out of the oven. Then, we decorated it with chocolate cream and candy sprinkles. Finally! We can eat it! Yummy! Last but not least, we welcomed Ayush in the Bear Cubs family. We are indeed growing! Having a blast this month, we can't wait for next!

Kind regards,

The Cubs Team
