

Dear Dolphin Families,

It is getting cooler outside and we can see the beautiful changing leaves. It is November. We have been learning about forces. Forces are either a push or a pull. Did you know that the natural force that pulls us to the ground instead of floating out into space is called gravity. However, not all natural forces are good. Some can be very dangerous, like earthquakes, tsunamis and typhoons. That's why it is important to practice what to do if there is a real emergency. Speaking of space, our monthly theme was "Our Universe". Space captures the imagination of children and adults alike. With an abundance of science experiments, classroom discussions and art activities, this theme was a big hit. On our "Space" theme party, students came to school dressed in black (the color of space) and space costumes such as astronauts, aliens, etc., and we whisked up some yummy UFO hotcakes. It was so much fun! In Oxford English, we read the fantasy story, "The Lost Stars". In this story, people are too busy to stop and look up at the beautiful night sky. The stars get fed up and decide to take a break. When the power suddenly goes "poof", the people are left in the dark, and a group of children sets off to track down the lost stars. We also finished our blends workbooks and began digraphs, and, in Collins Math, we have been learning about doubles and halves. This month we welcomed a new friend to Spinner Dolphins: Shlok. We also celebrated five birthdays: Ruhi, Shyla, Takashi, Jin Cai, and Ms. Shiori. We are now looking forward to our third fieldtrip to the Miraikan's Dome Theater in Odaiba and our Winter Concert!

Warm Regards,
Dolphin Team
